

AXCESS™
ANGLED PANELS

SMP Axxcess™ Solutions

Angled Patch Panels

General Information

SMP's new Axxcess™ Angled Patch Panels are a versatile alternative for higher density applications. The SMP Angled Patch Panel allows patch cords to be easily routed from the front of the panel directly into vertical cable managers, eliminating the need for horizontal cable managers.

By removing the need for horizontal cable managers, additional rack space is freed up for further patch panels, extra servers or supplementary active equipment.

SMP Warranty

Every SMP Data Communications product is backed by a 15 year out-of-the-box warranty. For more information on SMP's Angled Patch Panel Solution and other SMP Copper Closet Solutions, contact our Customer Service team directly at 800.880.7674.

Features & Benefits:
